Congratulations, if you counted 859 teams exactly... you are correct!

Divisions have been split due to the number of teams registered in them. When performing a division split, CHEERSPORT strives to split a division so that the "after split" divisions have an equal or nearly equal number of teams in them. The number of team members on each team determines which "after-split" division each team will join. In cases where this method is not able to create balanced divisions, a computer program is used to randomly place teams in the "after split" divisions. Randomly split divisions are indicated below with an *.
